The ideal powder recovery system for all applications

RED LINE HYPER CYCLONE (HC) type powder recovery booths are the perfect recovery systems where frequent color changes are required. **RED LINE HC** booths provide genuine powder recoveries of upto 95-98% - depending on the type of powder being used. **HC** cyclones are designed specifically for powder coatings, unlike many cyclones available which are actually only dust collectors - capable of collecting only heavy powder particles.

RED LINE HC booths are powder coated to provide a tough and smooth surface to the continuous flow of abrasive powder particles. The cyclone and its structure is built using a unique 'break-away' design enabling quick and easy dismantling for complete cleaning at the time of color change. Plus, the entire booth is built in panel form for safety and ease in packing and shipment.

As per International environmental requirements, every RED LINE HC booth is supplied with an after-filter system as a standard accessory. The after-filters ensure that the air exhausted from the recovery system is clean enough to be circulated back into the shop-floor.

Some standards HC batch booth

Model No.	Front opening W x H	Working size W x H x D	Overall size W x H x D	Powder reqd. (HP)
All dimensions are in Meters				
HC 1/1	0.8 x 0.8	1.2x1.0x0.8	1.2x1.7x0.8	01
HC 2/1	0.9 x 1.0	1.3x1.2x0.9	1.3x1.9x0.9	02
HC 3/1	1.2 x 1.2	1.6x1.4x1.2	1.6x2.0x1.2	03
HC 5/1	1.5 x 1.6	1.9x1.8x1.4	1.9x2.3x1.4	05
HC 7/1	1.8 x 1.8	2.3x2.0x1.5	2.3x2.5x1.5	7.5
Bigger and custom designed booths are also available on request
