An ISO 9001:2000 Company

PS Series

High performance
stand-alone powder sieving systems

SETTING BENCHMARK STANDARDS ...
... FOR OTHER TO FOLLOW

A wide range of powder sieving systems one to meet every requirement

RED LINE *PS Series*

The RED LINE PS Series range of powder sieving systems are high performance machines – designed and built for the quality-conscious user. A simple-to-operate with unmatched sieving results, the PS Series sieving system is the ideal add-on to a powder coating paint-shop.

The source of vibration is a sturdy electrical motor of appropriate capacity.

The PS Series sieving systems are available in a wide range of capacities – from the PS2.0 which has a rating 90 – 150 kgs/hr upto the PS4.0 which has a huge 200-240 kgs/hr throughput capacity (results may vary somewhat depending on the type of powder being sieved)

These sieving systems are available with and without a collection hopper.

These sieving systems are available as

... stand-alone sieving machines

... as part of a state-of-art MARS / SARS Multi-point and Single-point powder Auto Recycling Systems. These recycling systems draw powder from one or more powder recovery units in the booth PLUS (optional) from a hopper containing virgin (fresh) powder. The recovered powder and virgin powder are be mixed in a customized and infinitely adjustable and settable ratio before being sieved and fed back into the coating line through the master hopper

... integrated into 100 kV coating machines so that recovered and fresh powder is always sieved and cleansed before being used

Technical Specifications

Input:

Power supply:

220-240V AC 50 Hz single phase (110-120V AC 60Hz available on request)

Power consumption: Approx. 120 – 200 W (depending on the model)

Capacities:

PS2.0 90-150 kgs/hr

PS3.0 150 - 200 kgs/hr

PS4.0 200 - 240 kgs/hr

These are indicative capacities ... there may some variations at end-use depending on the kind of powder being sieved.

• All PS Series machines come mounted on a sturdy trolley
