**AUTOMATION IN
THE PAINT-SHOP**

SETTING BENCHMARK STANDARDS ...

... FOR OTHERS TO FOLLOW

Improve productivity in your paint-shop ...

... With better efficiency & quality

RED LINE offers a host of equipments for increased automation in your powder paint-shop. You choose the level of automation you require and RED LINE will assist you in installing it. RED LINE will guide you, advise you and suggest the optimum level of automation you may require based on your present, anticipated and planned production throughputs in your paint-shop.

201 Auto/x auto guns

RED LINE auto-guns for your powder paint-shop are based on the latest '201' platform.

These automated systems are built tough to operate 24/7 52 weeks of the year. The '201' platform means you enjoy a tough architecture in the unified control console a regulated power supply, a powerful electronic control pack and a distinct pneumatic pack to ensure every aspect of your powder coating requirements are taken care of. The 201 Auto powder feed pump and the powder gun can spray upto 500 gms/min or 30 kgs/hr of powder if required. The 201 Auto gun comes with an option for a self-cleaning electrode with an independent air supply through the gun. The Auto system comes in individualized configuration for 2 to 12 guns at a time to suit specific needs. Guns with their control consoles can be added on later as required under expansion.
